-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim states the deposit is etched to form a mirror, however, no structure is taught as to how the deposit is etched. The claimed statement appears to be a process limitation and fails to provide any structural limitation that one of ordinary skill can utilize to etch the deposit.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Berman (3658528).

Berman teaches a curved substrate (1a) which a deposit is placed upon (7a) and the deposit is cured via a lamp (2). See Figure 2.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Fogarty (5160749).

Fogarty teaches a curved substrate (40) having a deposit (76), the deposit being cured by a light source (78). See Figure 6.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hagmann (6800225) teaches a curved surface for substrate along with a radiation source to cure the deposit.

Altmann (2001/0054744) teaches a substrate along with a radiation source.

Pegram (2002/0185763) teaches lens molding that uses radiation source for curing and also curved substrate surfaces.

Kubena (5501822) teaches creations of mirror surfaces with etching.
